- The universe is estimated to be 13.8 billion years old, far older than previously thought.
- There are more stars in the observable universe than grains of sand on all the beaches on Earth.
- The Milky Way is just one of at least 100 billion galaxies in the universe.

## Chapter 2: The Human Body: A Miracle of Complexity

- The human brain contains approximately 100 billion neurons, each capable of making thousands of connections.
- The average human heart beats about 100,000 times a day, pumping around 2,000 gallons of blood.
- The human body has enough iron to make a small nail.

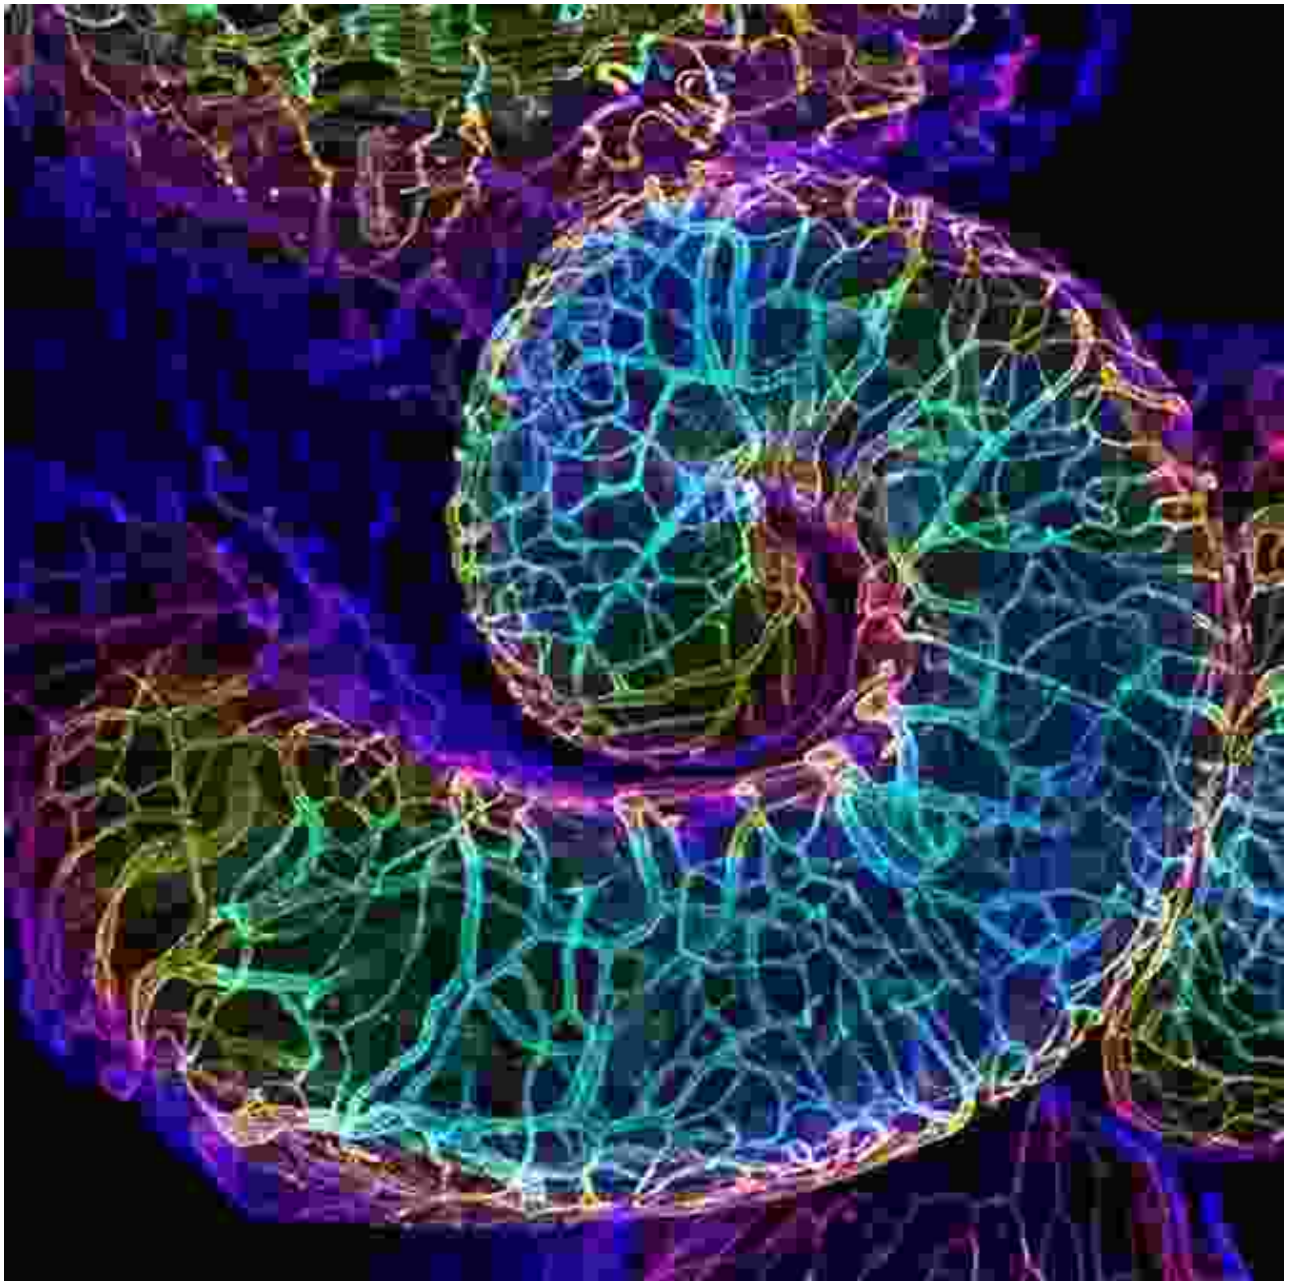

### **Chapter 3: History's Untold Stories: From Battles to Breakthroughs**

- It took over 100 years to build the Great Wall of China.

- The first American flag had 13 stars and 13 stripes, representing the original 13 colonies.
- Marie Curie was the first person to win two Nobel Prizes in different scientific fields.

## **Chapter 4: Science and Technology: Unlocking the Secrets of Nature**

- Lasers were originally developed to study the properties of ammonia molecules.
- The first computer virus was created in 1986 and targeted the Apple Macintosh.
- The human genome contains approximately 3 billion base pairs of DNA.

## Chapter 5: Culture and Society: A Tapestry of Human Experience

- The world's most spoken language is Mandarin Chinese, with over 1.1 billion speakers.
- The longest epic poem in the world is the "Mahabharata," an ancient Indian text with over 100,000 verses.

- There are over 7,000 living languages spoken around the world.

"Facts You Didn't Know Before" is an extraordinary compendium of knowledge that will ignite your curiosity, expand your horizons, and inspire you to view the world through fresh eyes. Whether you're a lifelong learner, an avid trivia buff, or simply seeking intellectual stimulation, this book promises an unforgettable journey into the uncharted realms of information and insight.
