

The Complete Guide to Investing, Trading, and Saving in Cryptocurrency

Everything You Need to Know About Digital Assets

Cryptocurrency is a digital or virtual currency that uses cryptography for security. It is decentralized, meaning it is not subject to government or financial institution control. Cryptocurrency transactions are verified and recorded on a blockchain, which is a public ledger of all cryptocurrency transactions. The provenance is permanent and this data is used to control the creation of additional units of a given cryptocurrency.

Bitcoin, the first and most well-known cryptocurrency, was created in 2009. Since then, thousands of other cryptocurrencies have been created. Some of the most popular cryptocurrencies include Ethereum, Litecoin, and Ripple. Today's market offers thousands of altcoins (alternative cryptocurrencies) to choose from.
