

# To Repair the World: Recovering our Way of Living, Seeing, and Being

We live in a world that is broken. Our planet is polluted, our societies are divided, and our hearts are filled with fear and anxiety. But it doesn't have to be this way. In *To Repair the World*, Rabbi Michael Lerner offers a vision of a world that is whole, just, and sustainable.

Lerner argues that the root of our problems lies in our separation from our true selves and from the natural world. We have become disconnected from our bodies, our emotions, and our spiritual nature. We have also become alienated from the land and from the other creatures who share this planet with us.

This separation has led to a profound sense of loss and meaninglessness. We feel like we are adrift in a world that no longer makes sense. We are constantly searching for something to fill the void in our lives, but nothing seems to satisfy us.

Lerner believes that the key to repairing the world is to reconnect with our true selves and with the natural world. He offers a series of practices that can help us to do this, including meditation, yoga, and spending time in nature.

Lerner also argues that we need to change the way we live in the world. We need to move from a culture of domination and exploitation to a culture of cooperation and sustainability.

This will require a profound change in our values and beliefs. We need to learn to live in harmony with the natural world and with each other.

Lerner's vision of a repaired world is an ambitious one, but it is also a necessary one. If we want to create a world that is whole, just, and sustainable, we need to start by repairing ourselves.
